

## SAVE OUR OAK TREES!

- The safest times to prune oaks are in the hottest months of summer and the coldest months of winter.
- Regardless of when you prune oak trees, it is essential that all wounds be painted or sprayed immediately (within 20-30 minutes of the cut).
- Hire only tree trimmers who are licensed by the City of San Antonio. You can check on their licensure by calling the City information number--311.
- If you do your own oak tree trimming, contact Kathy Fischbach (492-5897), Ken Lawrence (493-7936), or Nick Bustamante (492-4465) to borrow a paint pole to use in painting high and/or hard-to-reach areas.
- For more information, including oak wilt symptoms and treatment options, please visit [www.texasoakwilt.org](http://www.texasoakwilt.org).
